

Cleantech solutions

*Cleantech Solutions.
Anywhere.*

For marine, offshore and building industries

Vacuum collection

Wastewater treatment

Ballast water treatment

Fresh water generation

Marine growth prevention

Dry and wet waste treatment

Corrosion protection

Global leader

Evac is the world's leading provider of integrated water and waste management systems, as well as corrosion protection systems, for the marine, offshore and building industries.

Our cutting-edge solutions and services have been helping leading global players in the different industries to significantly reduce their environmental footprint for 40 years.

With offices in 14 countries across four continents and representatives in more than 70 countries, we pride ourselves on being close to our customers wherever in the world they are located.

Benefits of choosing us as your single provider

Simplified project coordination

Simplified system interface management

One stop shop for after-sales service with global footprint

Clear division of responsibility minimizes risk

Smooth integration and systems control

Wide range of available spare parts

Savings in time, human resources, and money

Our main customer segments:

Marine:

Cruise vessels

RoPax vessels and ferries

River cruise vessels

Yachts

Cargo vessels

Navy and coast guard vessels

Workboat and special vessels

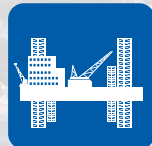

Offshore:

Accommodation vessels

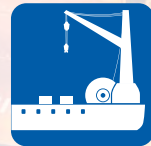

Construction and pipe laying vessels

Jack-up drilling rigs

Drilling rigs

Crane and heavy lift vessels

Semisubmersible platforms

Support vessels

Building:

Healthcare facilities and laboratories

Correctional facilities

Supermarkets, warehouses and shopping centers

Universities, offices and institutions

High traffic areas

Leisure and hospitality facilities

New Evac Solution Selection tool available on our web site <https://evac.com.mx/> makes it easier than ever to find the right Evac solutions for each application

We support our stakeholders by providing:

- Engineering and technical supervision
- Local codes and green building labels compliance
- Installation and start-up
- Service and repair
- Service contracts
- Refurbishment and retrofits
- Spare and replacement parts
- Training and education
- Onboard system and spares analysis.

All cleantech solutions from one partner

Our solutions and services help our customers to meet their waste and water management related environmental performance targets and to lengthen the life cycle of their vessels and constructions wherever they operate.

Vacuum collection

Vacuum toilets
Vacuum generation units
Vacuum tanks
Central vacuum cleaning units

Wastewater treatment

Wastewater treatment plants
Screening units
Grease separators

Ballast water treatment

Ballast water systems

Fresh water generation

Desalination plants
Potable water treatment units

Marine growth prevention

Cooling systems
pipework
anti-fouling

Dry and wet waste treatment*

Incinerators
Briquetting units
Compactors and densifiers
Food waste collection units
Dewatering units
Driers
Central vacuum cleaning units

Corrosion protection

Corrosion protection units

* Solutions for building industry customers are sold by Bvac

A man and a woman are sitting at a table in a meeting room, looking at documents. The man is pointing at a document on the table. The woman is looking at the document. There is a window with blinds in the background. A smartphone is on the table. A blue banner is overlaid on the bottom half of the image.

We support your sustainable operations

At Evac, sustainability is the cornerstone of our operations. As a preferred partner our vision is to build a cleaner world for everyone by helping our customers meet their waste and water management related environmental performance targets wherever they operate.

We significantly decrease the environmental footprint of our customers via our superior systems that

- save energy
- recycle waste
- purify wastewater and ballast water
- save fresh water
- lengthen life cycle of their vessels and constructions.

Certified operations

We work closely with relevant authorities and standards bodies, and our systems meet and often exceed the requirements of the relevant global and local environmental regulations. Our operations are ISO 9001:2015 (Quality Management Systems), ISO 14001:2015 (Environmental Management Systems), and OHSAS 18001:2007 (Occupational Health & Safety Management Systems) certified.
